

OfficeServ 7200

The next generation of IP platform is the OfficeServ 7200, providing IP based wired and wireless solution for voice and data communication. OfficeServ is the ideal solution for the future and the present office because it can simultaneously support both traditional voice communication, voice over IP, IP based data communication, and wireless solutions through Wireless LAN.

Integrated communication environment

The OfficeServ 7200 makes voice calls and sends/receives data by using the LAN/WAN modules. The user can use the integrated wire/wireless platform (phones, PCs, servers, mobile phones, or peripherals) to make communications easily.

IP based feature server

The OfficeServ 7200 uses an IP-based feature server to provide an IP solution, which integrates the functions of mail server, Session Initiation Protocol (SIP) server, and Voice over IP Unified Messaging Service (VoIP UMS).

Higher Quality IP Phone

The OfficeServ 7200 ensures the Quality of Service (QoS) of the voice calls depending on the priorities and grouping of data and voice packets. - Layer2 QoS: Priority Processing(802.1p), VLAN(802.1q) - Layer3 QoS: Class Based Queuing(CBQ), RTP Priority .Queuing, or the on demand management of the bandwidth Wide Area Network(WAN).

WAN/LAN Functions

The WAN and LAN interface modules are installed in the OfficeServ 7200; thus data can be sent/received via the interface of the 10/100 base T Ethernet in both the Intranet and the Intranet without any data equipment.

Wireless LAN, Mobility in your office

OfficeServ WLAN liberates you from the confines of your office and provides you with significant cost efficiencies because the qualified voice and data service of OfficeServ WLAN removes needless cabling and maintenance. With its support for the WIP-5000M WLAN phone, OfficeServ provides full voice-data convergence not only for fixed network connections but also on Corporate Wireless LANs.

IP UMS

Samsung OfficeServ supports IP UMS that provides you unified messaging service of telephone, IP Phone, e-mail, voice mail, and FAX. You are able to access to your communication devices through Samsung UMS whenever and wherever you want because Samsung UMS is Web based sophisticated solution.

Test-To Speech (TTS) Response

The OfficeServ 7200 converts text messages such as e-mails to voice messages and allows the users to listen to the messages through phones. Also, it recognizes the voices and responds to them.

Enhanced application

The OfficeServ 7200 offers enhanced applications such as OfficeServ News, EasySet, Internet Call Center, PC Console R-NMS, Internal board-type voice mail solution, Integrated facsimile server, and digital integrated recording systems.
